ABOUT US

RWA Distribution

RWA is the largest international distributor of premium high grade Airsoft equipment. We believe that supplying only the best quality Airsoft products to the market is the correct long term strategy for the overall health of the industry. Too often, new customers are discouraged from playing Airsoft due to bad experiences with low quality guns that break easily. We believe the only way to grow the industry is to let customers experience high quality guns that deliver a satisfying experience.

Originally developed as a business subsidiary of RedWolf Airsoft, RWA is now a separate company that focuses purely on wholesale distribution and licensed product development. Here are some reasons why you should consider us.

- **Dedicated Account Managers**

A dedicated account manager will take care of your needs, and recommend profitable products for your business. They may also visit your store personally to understand your business better, so they can help you grow.

- **Exclusive Products**

We are the exclusive distributor of several brands in different territories around the world. These include some of the most premium and sought after brands in the Airsoft industry.

- **Newest Products**

Want to start selling a new product before your competitor? Being the first to carry a new product can help generate a lot of business. We are often first to receive the largest allocation of new products, which means you will get it before anyone else.

- **Large Product Selection**

We carry approximately 20,000 unique products from all major premium brands, with a majority of them in active inventory and ready to ship.

- **Fast International Shipping**

If UPS, FEDEX or EMS flies there, we can ship to you within a few days time. Often times, we are even faster than local deliveries in your country! Large orders can enjoy low cost ocean freight shipping.

- **Best Prices**

As an exclusive and Tier 1 distributor for most major brands, we distribute products in large volumes which allows us to enjoy great prices. We carry over these cost savings to you, so that you can enjoy maximum profit in your business.

- **Technical Expertise**

With a team of experienced engineers that have over 20 years of Airsoft experience, we can customize and service all brands of Airsoft guns. We have also tuned high performance guns to cater to the high demands of police and military training. We also offer technical support to assist you in solving customer problems.

RWA Distribution

RWA est le principal distributeur mondial de produits airsoft haut de gamme. Nous pensons que promouvoir les produits de meilleure qualité est la meilleure chose à faire pour la santé à long terme de notre industrie. Très souvent, les nouveaux clients sont découragés à cause des mauvaises expériences passées, dues à la mauvaise qualité des répliques qui cassent facilement. Nous pensons que le seul moyen pour notre industrie de grandir est de fournir à nos clients des répliques de haute qualité qui leur permettent d'apprécier l'airsoft dans de bonnes conditions.

À la base développée comme un département de RedWolf Airsoft, RWA est maintenant une compagnie séparée qui se concentre uniquement sur la distribution aux professionnels et au développement de produits sous licence.

Nos points forts principaux sont,

- **Des chargés de clientèle à votre écoute**

Des chargés de clientèle dédiés prendront soin de vos requêtes, vous donneront des conseils sur les produits intéressants pour votre marché. Ils visiteront aussi vos boutiques pour mieux comprendre vos besoins, et pour vous aider à grandir.

- **Des produits exclusifs**

Nous sommes distributeurs exclusifs de plusieurs marques dans différents pays à travers le monde, notamment parmi les marques les plus haut de gamme et les plus recherchées du marché de l'airsoft.

- **Les produits les plus récents**

Vous voulez avoir les nouveautés avant vos concurrents? Être les premiers sur les nouveautés permet

de générer plus de ventes. Nous sommes souvent les premiers à recevoir la plus grosse allocation de nouveautés, ce qui signifie que vous les aurez en priorité.

- **Un grand choix de produits**

Nous possédons environ 20 000 références uniques de toutes les principales marques, dont la plupart en stock et prêtes à être envoyées.

- **Un envoi international rapide**

Partout où UPS, FEDEX ou EMS peuvent livrer, nous pouvons expédier en quelques jours. Nous sommes même souvent plus rapides que les livraisons locales de votre pays ! Pour les commandes larges, vous pourrez bénéficier d'envoi par bateau à bas coût ou de réductions sur les envois par avion aussi.

- **Les meilleurs prix**

En tant que distributeur exclusif de premier ordre pour la plupart des marques principales, nous distribuons les produits en grande quantité ce qui nous permet de bénéficier de prix compétitifs. Nous répercutons ces prix vers nos clients, pour que vous puissiez maximiser votre profit.

- **Une expertise technique**

Avec une équipe d'ingénieurs expérimentés qui ont plus de 20 ans d'expérience dans l'airsoft, nous pouvons customiser et offrir différents services pour toutes les marques d'airsoft. Nous avons aussi développé des répliques de pointe pour répondre à la demande de la police et des militaires pour leurs entraînements. Nous pouvons aussi offrir tout le support technique pour vous assister dans les problèmes de vos clients.

RWA Distribuzione

RWA è il più grande distributore a livello internazionale di articoli Softair di alta gamma. Siamo convinti che solo la fornitura di prodotti della migliore qualità sia la strategia corretta di lungo periodo che potrà beneficiare l'intero settore del Softair nel suo complesso. Troppo spesso, i nuovi clienti sono scoraggiati dal giocare a Softair a causa delle esperienze negative con armi di qualità scadente che si rompono con facilità. Crediamo che l'unica maniera per far crescere il settore del Softair sia quella di far provare ai clienti le armi di qualità, in grado di regolare soddisfazioni ed esperienze uniche.

Sviluppata inizialmente come consociata di RedWolf Airsoft, RWA è adesso una società autonoma focalizzata soltanto sulla distribuzione all'ingrosso e sullo sviluppo di prodotti con licenza. Ecco alcuni motivi per cui dovreste prenderci in considerazione:

Officially Distributed Brands

- **Account Managers attenti e scrupolosi**

Un account manager appositamente designato si prenderà cura delle vostre esigenze e raccomanderà prodotti vantaggiosi per il vostro business. Il nostro account manager può anche visitare personalmente il vostro negozio in modo da comprendere meglio la vostra attività ed aiutarvi a crescere.

- **Articoli esclusivi**

Siamo il distributore esclusivo di numerose marche in diverse parti del mondo. Si tratta di alcune tra la marche più rinomate e richieste nell'industria del Softair.

- **Ultime novità**

Vorreste iniziare a vendere un nuovo prodotto prima del vostro concorrente? L'essere in grado di proporre per primi un nuovo articolo può essere di notevole aiuto per l'incremento delle vendite. Siamo spesso i primi a ricevere il maggior quantitativo dei nuovi prodotti lanciati sul mercato, il che comporta che li potrete avere prima degli altri.

- **Vasta scelta di articoli**

Abbiamo circa 20 000 articoli unici delle migliori marche, con il vantaggio che la maggior parte è già disponibile nel nostro magazzino, pronta per la spedizione.

- **Spedizioni internazionali veloci**

Se UPS, FEDEX o EMS servono la vostra località, possiamo eseguire le consegne nell'arco di pochi giorni. A volte, riusciamo ad essere ancora più veloci dei corrieri locali nel vostro paese! In caso di grossi ordini, è possibile beneficiare di costi più bassi con spedizioni via mare.

- **I Prezzi Migliori**

Essendo distributore di livello 1 ed esclusivo per molte marche, distribuiamo e trattiamo grandi quantità, cosa che ci permette di potere usufruire di prezzi più vantaggiosi. A nostra volta, passiamo questa riduzione di costi a voi, in modo che possiate ottenere un maggiore profitto nella vostra attività.

- **Competenza tecnica**

Grazie al nostro team di ingegneri esperti con più di 20 anni di esperienza nel settore del Softair, siamo in grado di effettuare personalizzazioni e customizzazioni su repliche e marche di ogni tipo. Abbiamo anche messo a punto e regolato armi ad alte prestazioni per soddisfare le esigenze di addestramento

delle forze di Polizia e dei corpi militari. Offriamo anche un servizio di supporto tecnico che vi assiste nel risolvere i problemi con la clientela.

Дистрибуция RWA

RWA является крупнейшим международным дистрибьютором высококачественного оборудования премиум-класса для игры в страйкбол. Мы считаем, что поставки на рынок продукции для игры в страйкбол исключительно наилучшего качества являются верной долгосрочной стратегией для благополучия всей отрасли. Слишком часто новых клиентов отговаривают от игры в страйкбол из-за низкокачественного оружия, которое довольно быстро приходит в негодность. По нашему мнению, единственный способ добиться роста отрасли – это дать возможность клиентам воспользоваться высококачественным оружием, что позволит им получить положительный опыт использования такого оружия. Изначально основанная в качестве дочернего предприятия «Рэд Вулф Эрсофт» (RedWolf Airsoft), компания «РВЭ» сейчас является отдельным юридическим лицом, которое концентрирует свою деятельность исключительно на оптовой дистрибуции и продвижении лицензированных продуктов. Вот несколько причин, по которым вам следует рассмотреть нашу кандидатуру.

- **Персональные менеджеры**

Персональный менеджер позаботится о всех Ваших нуждах, а также посоветует выгодную продукцию для вашего бизнеса. Они также могут лично посетить Ваш магазин, чтобы более детально изучить Ваш бизнес и помочь Вам добиться необходимого роста бизнеса.

- **Эксклюзивная продукция**

Мы являемся эксклюзивным дистрибьютором нескольких брендов в различных местах по всему миру. Такие бренды включают несколько лучших и самых востребованных брендов в отрасли страйкбола.

- **Новейшая продукция**

Хотели бы Вы начать продажи нового продукта до того, как это успеет сделать Ваш

конкурент? Если Вы будете первым, кто представит новый продукт, это поможет создать множество возможностей для Вашего бизнеса. Довольно часто мы являемся первой компанией, которая выступает дистрибьютором наибольших объемов новой продукции, и это означает, что Вы будете первым, кто получит такую продукцию.

- **Большой выбор продукции**

Ассортимент уникальной продукции от основных брендов составляет 20,000 единиц, большая часть которых находится в активном обороте и готова к отгрузке.

- **Быстрая доставка в другие страны**

Если такие компании как «ЮПС» (UPS), «ФЕДЕКС» (FEDEX) или «ЭМС» (EMS) совершают рейсы в такую страну, мы можем отгрузить Вам товар в течение всего нескольких дней. Довольно часто мы доставляем товар быстрее местных компаний-перевозчиков в Вашей стране! В отношении крупных заказов возможна низкая стоимость доставки товара морем.

- **Лучшие цены**

Будучи эксклюзивным и первоклассным дистрибьютором основных брендов, мы поставляем продукцию крупными объемами, что позволяет нам предлагать самые низкие цены на продукцию. Мы предлагаем Вам такую возможность экономии средств, чтобы Вы могли получить максимальную прибыль от Вашего бизнеса.

- **Техническая экспертиза**

С командой опытных инженеров, которая имеет более чем 20-ти летний опыт работы с оборудованием для страйкбола, мы можем поставлять продукцию по техническим условиям заказчика и обслуживать все бренды, производящие оружие для игры в страйкбол. Кроме того, мы оптимизировали скорострельное оружие под высокие требования полиции и военной подготовки. Мы также предоставляем услуги по техническому обслуживанию, стремясь помочь клиентам в разрешении их проблем.

Exclusive Licenses

The German MG34 is an iconic machine gun that was first produced in 1934. Seeing it's first service during the Spanish Civil war, the MG34 had an astonishing rate of fire and an impressive range. Apart from a few Japanese manufacturers who made the MG34 many years ago, the Airsoft industry has never had an MG34 this realistic with a reliable modern AEG gearbox until now. Made from steel, aluminium, and wood, this MG34 runs on a custom gearbox with Marui compatible gears and parts. Automatic drum winding magazine holds 1500 BBs, which can be loaded without removing the drum magazine from the gun. Adjustable rear sight. Top cover is opened for servicing and battery storage. Moving charging handle, fully functional steel bipod, and adjustable rear sight. Shoots in full auto mode only. Limited to 500 units worldwide. Controversial markings are not engraved on gun but can be special requested where legal.

REG I REP

MG34

Product Code: RWL-MG34

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 6600 g
Length: 1230 mm
Capacity: 1500 rds
Approx. Power: 350 fps
Power Source: Lipo 11.1v
Blowback: No
Shooting Mode: Auto

Development of the ZB-26 began in 1923 after the Czechoslovak Brno arms factory was built. Designer Václav Holek was charged by the Czechoslovak army with producing a new light machine gun. He was assisted by his brother Emmanuel, as well as two expatriate Poles: Marek and Podrabsky. Holek was a genius as a firearms designer; he quickly began work on a prototype and within a year the quartet had created an automatic light machine gun that was later known as the ZB. The Czechoslovak army quickly adopted the ZB as the vz. 26, and many other countries later adopted the ZB or similar designs.

Rock ZB26 (Deluxe Version)

Product Code: Rock-ZB26

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 5,450 g
Length: 1,170 mm
Capacity: 160 rds
Power: 300 fps
Battery Size: 7.4 LiPo
Shooting Mode: full auto

Based in the Ozark Mountains in Arkansas USA, Nighthawk Custom is world famous for their high quality custom 1911 pistols which are the market leader for high performance shooters and competition shooters. As seen in the MAGPUL DYNAMICS video used by the instructors, Nighthawk Custom pistols are refined to the highest levels of craftsmanship. Chris Costa & Travis Haley both use Nighthawk Custom pistols in their 1911 instructional classes, which says a lot about the quality and performance of Nighthawk Custom 1911s. This fully licensed version of the Nighthawk Custom GRP Deluxe Version is commensurately high quality and well crafted compared to lesser pistols in the Airsoft world, with a full CNC 6065 aluminum frame and slide. Nighthawk Custom reviewed and approved this Airsoft frame and slide before production to exacting measurements of the real gun. The deluxe version offers some new features as the trigger, slide lock, safety, grip house and barrel bushings are the exact same dimensions as the real steel version.

Shooting Mode: Semi

The fully licensed Nighthawk Custom Recon model is designed for avid skirmishers who want a handsome, tactical, reliable and affordable sidearm. The RECON is inspired by a special model that Chris Costa designed for Nighthawk Custom. Constructed from die-cast aluminium alloy and CNC detailing, this CO2 powered gas blowback is powerful and durable, and operates well in both warm and cold weather alike. The most notable feature of this pistol is the eye opening recoil that surpasses that of most Airsoft pistols, making this a best seller for many of our dealers. Effective power of 400fps on 0.2g BB's means this gun can be used in large outdoor fields. It also offers an accessory rail system for attaching flashlights and lasers for tactical use. Spare magazines available separately.

Samson Star-C 7 Inch RIS Rail for M4 (Officially Licensed)

Product Code: RWL-SAMSON-M4001

SPECIFICATION

Weight: 297 g
Length: 180 mm
Material: 6061 T6 Aluminium

This fully licensed Samson STAR-C rail is a standard 7" length free floating carbine rail. It offers a removable lower rail so that you can install an M203 grenade launcher. If the rail looks familiar, the reason is simple. Samson Manufacturing has been making RIS rails for Troy Industries for many years, until 5 years ago Samson decided to manufacture under their own brand instead. Currently under review to win a massive US government contract, these rails may well be equipped on every American soldier's M4 very soon.

ACCESSORIES: MASKS

RWL's Theatrical Action Game Masks are the most high quality protective action gamer masks available. Handmade and hand painted, they offer 2 levels of eye protection. First level is a stainless steel mesh, while an inner polycarbonate lens provides additional protection against projectile fragmentation. This translates to a supreme level of protection that can withstand high velocity projectiles from Airsoft or Paintball alike.. Built from multiple layers of fiberglass, RWL masks are rugged and durable, and made to last. The paint used is certified to be safe and environmentally friendly. Built by the same factory that made the original Takaplupa masks, these RWL masks are the original and best there is. Fully adjustable head-straps with Fit Foam® technology for a very comfortable non-slip fit. Don't be fooled by inferior copies that do not offer the same level of protection or durability. Get this original!

Power: 460 fps
Shooting Mode: semi, 3rds burst

Without a doubt, the Inokatsu Colt 1911 Military 100th Anniversary gas blowback Airsoft pistol is the most realistic of its kind to ever exist. Manufactured using the same process employed by Colt to make the original 1911, this pistol has a steel slide and lower frame, with real wood grips. All components found on the pistol are also made from steel for maximum realism. Powered by a 12g CO2 capsule stored inside the removeable full size single-stack magazine, it generates impressive recoil that is unmatched by any airsoft pistol. It also delivers very useable power and range for practical skirmishing. This is as real as it gets.

INOKATSU™

GAS PISTOLS & SMGS

Colt M1911 Military 100th Anniversary (CO2 version)

Product Code: INO-COLT-1911-MIL

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 952 g
Length: 220 mm
Capacity: 28 rds
Approx. Power: 300 fps
Power Source: Co2
Blowback: YES
Shooting Mode: semi

The INOKATSU M4A1 SOPMOD is built and assembled with exacting precision. The entire gun is solid with no wobbles or shakes making the Inokatsu M4A1 feeling just like the real steel. The Inokatsu M4A1 features a weight adjustable bolt carrier for full control of the shooting experience. At full bolt weight, it delivers a highly realistic recoil experience that will send shockwaves through your entire arm. But if you are a skirmisher and want a faster rate of fire rather than recoil, simply remove the weight from the bolt for a

crisper shooting experience. This is, without a doubt, the most realistic Airsoft M4 in existence today. For best performance, we recommend you use either WA or ProWin magazines (with a ProWin reinforced hammer spring installed). Also check out the short CQBR version, which is the US Navy SEALs' weapon of choice. The CQBR is identical to the standard M4 in every way, except that it comes with a shorter barrel. B-Grade models also come with slight imperfections to the receiver's finishing, which is why they are priced lower.

INOKATSU™

CONVERSION KITS - AEG

AKM Conversion Kit (New Version)

Product Code: INO-121

Inokatsu continues to reign as the most realistic Airsoft manufacturer, and this AKM Conversion kit is no exception. Made with a beautifully finished steel body and real wood grips, this kit turns a standard Marui compatible AK47 into a stunning work of art.

Airsoft Surgeon is world-renowned for making the world's finest custom Airsoft guns. Starting his career in real steel IPSC shooting, and later directing his passion into Airsoft, Clarence Lai, owner and founder of Airsoft Surgeon, continues to wow the world with his masterpieces. Airsoft Surgeon guns are extremely high performing and visual masterpieces. Most Airsoft Surgeon guns start from a Marui base gun, and are customized in and out with Airsoft Surgeon CNC machined and hand-made parts. Tuning involves high flow porting of nozzles, trigger tuning, recoil travel and speed tuning, and much more - which all adds up to a razor sharp shooting experience. Some users will operate these guns in the competitive circuit for which they are intended, while other serious Airsoft players will use them for skirmishing and training. Some models are full blown open class raceguns complete with long barrels, compensators and mounted scopes where as others go with a more conservative executive carry look. Whatever your wildest dreams are, Airsoft Surgeon can do it for you. New models come out monthly in limited quantities, and special requests are also entertained. Inquire for details.

Craftsmanship is a key part of Airsoft Surgeon's collection, and only the best materials will do. This piece marks Airsoft Surgeon's exploration of IPSC Airsoft guns as showpieces. Generously hand-appointed genuine Swarovski crystals cover the CNC aluminum grip to create a stunning visual effect. The crystals also provide added grip when shooting. But this piece of work is not just about looks, and comes with all the performance you expect from Airsoft Surgeon pistols. Full CNC aluminum slide, compensator, and grip, with a full set of custom parts. Tuned with a 2lb trigger and high accuracy with precision barrel, ported nozzle, and high recoil speed making this gun race ready. Airsoft Surgeon's Infinity SWAROVSKI Crystal Rouge Capsicum Open (Black / Red) is for the most discerning aficionado who wants the best that money can buy."

Shooting Mode: semi

The new XDM from WE is an authentic replica, and is essentially a copy of the Tokyo Marui version. It comes with metal slide and polymer lower frame, and works on green gas. They closely resemble their predecessor, the HS2000 pistol (most widely known in the United States as Springfield Armory XD) Popular in the USA and Croatia, where the real gun is manufactured.

GAS PISTOLS & SMGS

Model 17

Product Code: GUNT0387

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 776 g
Length: 190 mm
Capacity: 24+1 rds
Approx. Power: 290 fps
Power Source: Green Gas
Blowback: YES
Shooting Mode: semi

Model 17 gas pistol by WE, no real guns trademarks but some equally attractive WE markings. It's solid built, there are no wobbles, squeeks, rattles, or creeks, the grip is polymer and it has really nice gripping.

This WE model17 is a worthy replica of the real deal, combining excellent mechanics with the authentic-looking aesthetics of the exterior. As you would expect from WE, this is a well-built gas blowback pistol, which is mechanically and physically very solid. Hard-kicking blow back system makes you feel pleasant to shoot it. Internal hammer system allows the gun to be pre-cocked for instant shooting. The trigger design means that accidental discharge is prevented unless you deliberately pull the trigger with your finger

GAS PISTOLS & SMGS

N&P XW40 GBB

Product Code: GUNT0431

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 750 g
Length: 215 mm
Capacity: 21+1 rds
Approx. Power: 320 fps
Power Source: Green / HFC134A
Blowback: YES
Shooting Mode: semi, auto

The WE N&P features a metal slide, polymer frame, slide release and slide catch lever, a textured grip, and three different sized backstraps(PINK and Black). Complete with a unique serial number. Works reliably with green gas.

The Parabellum-Pistole, otherwise known as the Luger pistol, is a self-loading pistol introduced by Deutsche Waffen- und Munitionsfabriken (DWM) starting in the 1890s. In the first half of the 20th Century it proved to be a popular service pistol, being used by the Germany during both World War I and World War II.

This P08 released by WE from Taiwan, is made full metal, which feels realistic to hold because of the weight and cool touch. The only exterior plastic parts are the grip plates! It operates just like the real gun, with the toggle action function that jumps back and upwards for each shot, and locks open on an empty magazine. It provides 300ps with using Green Gas and .2g BBs.

GAS PISTOLS & SMGS

AK74 GBB (Open Bolt)

Product Code: GUNT0381

WE have ported there now established open-bolt gas-blowback rifle technology into this classic Russian pattern. Mostly steel, the weapon has touches of polymer (like the furniture) but is otherwise all metal making it hefty and robust. Unlike AEG models, the top plate has zero wobble; this one sporting a rock solid attachment. The frame stock is also metal, it side folds to the right; full weapon length is 703 mm which drops to 500mm when folded down. It clocks in at around 380 FPS using Top | propane gas and 0.2g 6mm BBs. The rate of fire is decent but not too high, just as well as this model has a 50 round magazine a enough kick to through your aim off on full auto if your not holding it firmly. The fire selector is just like the real thing, a right side lever (half position for semi, full down for full auto); when in safety, the lever prevents the bolt from full cycling. The receiver includes the Soviet style side bracket for the addition of Russian style mount optics (not included). The outer barrel has 14mm clockwise threading although the flash hider spring-loaded stopper means you should probably stick the the stock flash hider anyway.

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 3,124 g
Length: 703 mm

The real steel Stoner 63, also known as the XM22/E1, was an American modular weapons system designed by Eugene Stoner in the early 1960s. It was put to use in very limited numbers in Vietnam by members of the United States Navy SEALs and several law enforcement agencies at the time. This G&P version uses a Version 2 gearbox with 8mm bearing and G&P M120 high speed motor so that it can act as a true squad weapon. It uses a 440mm long inner barrel putting it about midway between an M4A1 and M16. Automatic winding box magazine. Battery stored in rear stock with deans clip. Popular with Vietnam era reenactors.

AEG I AEP

SOCOM GEAR's officially licensed M200 gas powered sniper rifle is the most powerful and realistic bolt action rifle available in Airsoft. Shell based design shooting 8mm BBs at 1.8 joules in stock form, an optional CO2 bolt is available separately to increase the power closer to 3 joules. Metal shells load and eject like the real thing. Please check local laws before installing. Full metal body and designed for advanced players and collectors. Gun comes with 5 shells, and additional spare shells available in packs of 5. Magazine has a 7 round capacity. Spare parts are available from RedWolf. Key appeal lies with the fact that this model was used in the movie SHOOTER, and was widely reported on Discovery Channel's Future Weapons broadcast. This kind of power mandates long distance engagement. Both tan and black versions are popular.

Based on the KJ MK1 which is famous for its high power, the SOCOM GEAR OASIS adds a fully licensed integrated GEMTECH silencer which lengthens the inner barrel to generate a 420fps of power. Double action trigger non-blowback design means the user shoots as fast as the trigger can be pulled. Customer appeal lies with the large diameter integrated suppressor, high power, and low price.

GAS PISTOLS & SMGS

Oasis

Product Code: SG-OASIS

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 670 g
Length: 288 mm
Capacity: 16 rds
Approx. Power: 420 fps
Power Source: Green Gas
Blowback: NO
Shooting Mode: Semi

SOCOM GEAR's licensed TimberWolf is a replica of the model made by Lone Wolf distributors in the USA, a specialist in Glock accessories. The Timberwolf is a variant model that uses a new lower frame designed by Lone Wolf. Key differences include a more upright grip angle and larger beavertail for more comfortable shooting. Metal slide and polymer lower frame, this model operates on green gas and is 100% Tokyo Marui compatible (Marui Model 17 magazines are interchangeable). Package comes with 2 sizes of backstraps. 14mm counter clockwise thread adapter allows attachment of suppressor.

GAS PISTOLS & SMGS

Timberwolf Model 17

Product Code: SG-GBB-TW

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 782 g
Length: 210 mm
Capacity: 24+1 rds
Approx. Power: 280 fps
Power Source: Green Gas
Blowback: YES
Shooting Mode: Semi

SOCOM GEAR's Hitman model M9 is inspired by the movie Leon The Professional, and is a full metal M9 based on the WE platform. Key attraction is the large compensator styled exactly to Jean Reno's weapon in the movie. Special engravings including "No Women, No Kids", "The Hitman", and "Made in Hell" set the tone for this assassin's pistol. Includes lanyard loop and painted front sight. This is a popular model for many.

GAS PISTOLS & SMGS

HITMAN M9 GBB with customized engraving comp.

Product Code: SG-HM9-BK

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 782 g
Length: 210 mm
Capacity: 24+1 rds
Approx. Power: 280 fps
Power Source: Green Gas
Blowback: YES
Shooting Mode: Semi

The most popular spring cocking Airsoft rifle of all time, the Marui VSR10 delivers high grade performance at an affordable price. Despite plastic construction and modest factory power levels restricted to 0.98 Joules by Japanese law, the VSR10 is extremely accurate, and an exceptional hop-up makes up for the distance. ABS plastic stock and metal barrel, with metal cocking lever. Marui designed that each shot generates a slight bit of recoil as feedback. A large number of after-market accessories are available from other manufacturers for the VSR10, making it the most upgradeable sniper rifles in the world. This is an anchor product of any Airsoft dealer. Base VSR10 Pro-Sniper version comes in black and desert tan. A Real Shock version comes in wood pattern, while the G-SPEC version adds a suppressor and is available in black and olive drab. The premium Pro-Hunter version includes a scope and is available in black and wood pattern.

SNIPER RIFLES

VSR-10 Pro-Sniper Version

Product Code: TM-VSR10-BK

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 1,923 g
Length: 1,075 mm
Capacity: 30 rds
Approx. Power: 275 fps
Power Source: Spring Cocking
Blowback: NO
Shooting Mode: Single

This spring bolt-action on the L96 AWS from Tokyo Marui is exceedingly smooth and easy to use. ABS plastic stock and metal barrel, upper receiver and scope rail, magazine, bolt. Bipod mount can take optional bipod. Fully adjustable stock. Marui hop-up systems are the best in the business and helps deliver long range BB flight despite modest factory power due to Japanese legal restrictions. A more tactical alternative to the VSR10.

SNIPER RIFLES

L96 AWS (Black)

Product Code: TM-AWS-BK

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 3,510 g
Length: 1,100 mm
Capacity: 40 rds
Approx. Power: 303 fps
Power Source: Spring Cocking
Blowback: NO
Shooting Mode: Bolt Action

A hugely popular M9 based pistol spawned by the video game, Biohazard (known as Resident Evil in Japan). Plastic slide and frame, with metal recoil guide rod (silver), trigger, front/rear sights, slide lock, magazine, magazine release, safety, hammer. Fixed hop-up. Full gas blowback cycling action. Badged S.T.A.R.S Raccoon Police on grip. Engraved S.T.A.R.S. RPD Special Team on slide. Will take green gas but recommend using propane gas in hot weather to avoid damage. A cult gun that is popular with younger players, cosplayers or collectors. Compatible with standard Marui M9 magazines.

GAS PISTOLS & SMGS

Biohazard Samurai Edge Std. Mod.

Product Code: GP080-TM

SPECIFICATION

Hop-Up: FIXED
Weight: 740 g
Length: 217 mm
Capacity: 26 rds
Approx. Power: 275 fps
Power Source: HFC134a, Green Gas
Blowback: YES
Shooting Mode: SEMI

This model is the foliage camouflage version of Marui's 1911 platform, with ABS plastic slide and frame, and a tactical rail on the bottom for accessories. It is identical to the Desert Warrior save the color scheme. It's very much a custom 4.3 designed specifically for enthusiasts who employ foliage load out. Key selling point is ACU pattern grips and commander sized frame. Featuring extra wide ambidextrous safety, Novak sights, custom grip and a rail adaptor. Operates on green or propane gas with adjustable hop-up.

GAS PISTOLS & SMGS

Foliage Warrior

Product Code: TM-4952839142450

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 814 g
Length: 205 mm
Capacity: 28 rds
Approx. Power: 280 fps
Power Source: HFC134a
Blowback: YES
Shooting Mode: Semi Auto

Tokyo Marui's Night Warrior is essentially an M.E.U. with different externals. It is a more tactical alternative to the MEU or 1911 with Kimber style grips. Same solid performance as all other Marui single stack 1911 models.

GAS PISTOLS & SMGS

Night Warrior

Product Code: TM-GBB-NWAR

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 838 g
Length: 225 mm
Capacity: 28 rds
Approx. Power: 240 fps
Power Source: HFC134A
Blowback: YES
Shooting Mode: Semi

A more compact commander sized 1911 platform with a strike plate up front. This was all the rage a few years back but continues to attract those looking for something different that goes with their Surefire flashlight. Same great performance as all other Marui 1911's, although shorter barrel delivers less power and range.

GAS PISTOLS & SMGS

Strike Warrior

Product Code: TM-4952839142474

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 818 g
Length: 205 mm
Capacity: 28 rds
Approx. Power: 250 fps
Power Source: HFC / Green / TOP
Blowback: YES
Shooting Mode: Semi Auto

A shorter version of the most popular Airsoft pistol in the world, the Hi-Capa 4.3 is popular with customers looking for a hassle-free integrated accessory rail system. Double-stack sized magazine means larger volume of gas delivers more stable performance for a higher number of shots. The larger Hi-Capa 5.1 is not railed. Excellent performance and upgrade potential makes the Hi-Capa series the best selling gun in the business.

GAS PISTOLS & SMGS

HI-CAPA 4.3

Product Code: TM-GBB-HICAPA43

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 850 g
Length: 199 mm
Capacity: 28 rds
Approx. Power: 290 fps
Power Source: HFC134a, Green Gas
Blowback: YES
Shooting Mode: Semi

A tactical version of Marui's standard single stack 1911, it comes with a rubberized grip and larger beavertail. Popular with customers employing the US Marine Corps loadout.

GAS PISTOLS & SMGS

MEU Pistol (1911)

Product Code: TM-GBB-MEU

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 800 g
Length: 220 mm
Capacity: 28 rds
Approx. Power: 300 fps
Power Source: HFC134A, Green Gas
Blowback: YES
Shooting Mode: semi

The most popular and best selling gas blowback pistol of all time thanks to it's affordable price and reliable performance. This is also the most popular platform for IPSC pistols since the Marui hop-up system is so good and makes this gun extremely accurate. Recoil performance is also very good, delivering a gratifying shooting experience. Can safely operate on green gas. Metal parts included : recoil spring guide rod, nickel plated hammer, adjustable rear sight, front sight, magazine catch, magazine, and frame with an ABS grip. The barrel is also handsomely nickel plated. Gun is acceptable weight thanks to the metal lower frame. Includes a lower RIS rail (requires customer to drill and install themselves) into lower frame. Key appeal is the massive number of after-market parts available to customize this pistol. This is a anchor pistol for any serious retailer.

GAS PISTOLS & SMGS

HI-CAPA 5.1

Product Code: TM-HICAP51

SPECIFICATION

Hop-Up: ADJUSTABLE
Weight: 895 g
Length: 222 mm
Capacity: 31 rds
Approx. Power: 290 fps
Power Source: HFC134a, Green Gas
Blowback: YES
Shooting Mode: Semi

The Desert Warrior 4.3 was released during the war in the middle east, and was extremely popular during that period of time. Essentially a commander sized single stack 1911 with Kimber grips and desert tan color scheme. Featuring extra wide ambidextrous safety, Novak sights custom grip and a rail adaptor.

GAS PISTOLS & SMGS

Desert Warrior 4.3

Product Code: TM-GBB-DSWR

SPECIFICATION

AIRSOFT INNOVATIONS

Airsoft Innovation makes the best grenades available today, with either impact triggered, or timer triggered. Both models are engineered to be durable, reusable, and most of all, effective. The tough outer shell can survive hundreds of throws, the grenade can be filled with readily available cheap propane, and the patented, dual-spiral design ensures a 360 degree spread of 200 BBs. Includes silicon oil lubrication for maintenance. Distraction Device Kit (available separately) can turn your grenade into a stun device generating close to 120dB of sound. Extra pins and spoons are highly recommended since this is a consumable item.

AIRSOFT SYSTEMS CONTROL UNIT

Product Code: ASYS-ASCU-V2

The Airsoft Systems ASCU II for Version 2 gearboxes purports to be a simple drop-in kit that will give your gun PTW-like performance, including a snappy, responsive trigger and programmable burst-modes. At less than £70 from Redwolf Airsoft, this bold claims too good to be true... Surely it's not that simple, is it?

The ASCU makes the bold claim of giving an AEG the performance of a PTW because it tackles the problem of harnessing the power of high voltage batteries more intelligently, much like the PTW. Whilst a PTW might cost up to as much as £1200, the ASCU will drop into an AEG of around £250, and only cost £70 itself, but what is it? Put simply, the ASCU is a string of electronic components that replaces the existing wiring in an AEG directly. You simply remove the old stuff, the basic switch trigger with its fragile stop lever, the fiddly anti-reversal latch and the frustratingly tiny selector plate springs, and you replace them with a responsive micro-switch, a switching sensor unit and a control board including a MOSFET. It all sounds very complex, but Airsoft Systems have done all the hard work for you, you don't even need to get the soldering iron out.

In a few simple steps you can ditch the rudimentary technology of the AEG and move into the here-and-now, but does it make your gun into a Systema killer? With the ASCU you get the following features:

- Computer controlled sector gear monitoring.
- Consistent cycle completion.
- No gearbox lock-ups.

- A realistic, crisp trigger, with shorter travel.
- Battery voltage monitoring.
- Programmable fire modes including:
 - Safe + Semi + Burst & Full Auto
 - Safe + Semi + Full Auto
 - Safe + Semi + Burst
 - Safe + Semi

With the raft of features on offer from the ASCU we can see why Airsoft Systems feel comfortable making such a bold claim, and after fitting one, we agree that the performance is certainly PTW-like. The trigger feels far better than a standard AEG, the response is much faster and the burst modes are astoundingly satisfying. The comfort of knowing your gun will always fire with a complete cycle, no matter how long you hold the trigger down is also a huge comfort. Even amid the stress of the skirmish field, the hastiest grab of the trigger won't cause a potentially piston-stripping stuttered cycle. You gain the flexibility of being able to programme the fire modes on offer from the standard selector switch too, which is a simply matter of disconnecting and reconnecting the battery, and pulling the trigger and moving the fire selector in

a certain sequence, following the indication of beeps emitted by the electronics safely stored inside your AEG. Single shot only games need never be an issue again, and setting your gun to the "safe+semi" mode renders it incapable of firing fully auto until you reprogram.
