# INTRODUCTION

**Congratulations on purchasing an Inokatsu Colt 1911 Military 100th Anniversary (CO2 version). You are one of the exclusive few to own this masterpiece.**

Licensed by Colt with official design input from the reknowned real steel firearms manufacturer, there are few other guns on the market that have benefited from such major input from a real gun manufacturer. Chief Designer Domanic Lu, Founder and CEO of Inokatsu, is known for his passion in making guns that feel like the real thing. Putting extensive focus on the shooting experience, Inokatsu's past works have featured the collectible M60 series and the super realistic M4, the latter which still stands as the undisputed king of the gas blowback rifle category in terms of recoil and realism.

Not satisfied with just an M4, Inokatsu teamed up with Colt to create the new 1911, which is intended to celebrate the 100th year anniversary of the legendary 1911 pistol. The LUX limited edition made it's debut in 2011, with this regular version now making it's release in 2012.

Given the quality and real gun manufacturing processes involved in making this gun, this is the most realistic 1911 ever. But then again, you never expect Inokatsu guns to be economical given their collectible appeal and low volume manufacturing techniques. Please note this gun is made of steel so keep in a cool dry place.

# INSTRUCTION

## Adjust the Hop-Up

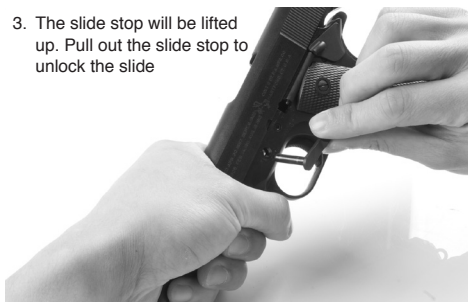

1. Pull the slide back until the slide stop is aligned to the arc mark on the slide to take out the slide stop.

2. Press the small round pin on the right side of the pistol.

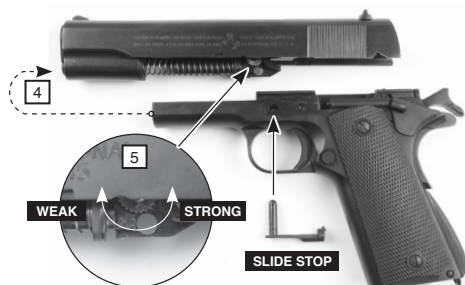

3. The slide stop will be lifted up. Pull out the slide stop to unlock the slide.

4. Now you may pull the slide out. The Hop-up adjuster is underneath the slide.

5. You may tune it left (for weaker back spin on the BB) or right (for stronger back spin on the BB)

## Install a new CO2 gas cartridge

1. Unscrew the piercing knob by turning it counter clockwise, until it is all the way out.

2. Insert the new CO2 cartridge into the airsoft magazine.

3. Tighten the piercing knob by turning it clockwise until you hear a hissing sound indicating the CO2 cartridge has been pierced. Tighten an additional quarter rotation.

4. Make sure your airsoft gun is on "SAFETY" before you insert the magazine back to the gun grip.

**⚠ WARNING: Do not ever unscrew the magazine butt plate when there is still CO2 gas in the magazine!**
